

THE SAVEBOX SYSTEM

LOCKER-TYPE MEDICAL ITEM DISTRIBUTION SYSTEM

SaveBox Smart is our compact and independent medical vending machine that controls several types of smaller storage and distribution lockers: SaveBox Basics. It is like building blocks: you can pick one or even a set of different size Basics to be attached to your SaveBox Smart, giving you the ability to design a custom-build locker setup, matching your needs perfectly. Thanks to an optional function – SaveBox Basic's built-in scale – you can use SaveBox Smart for the 100% controlled distribution of bigger, heavier and fragile products or even small items, which are stored in bigger volume and difficult to measure one-by-one.

Paul Dobrava

We have introduced IVM solutions in several Czech hospitals. Due to the machines' small sizes and fast refilling capabilities, they are big success.

Why SaveBox system?

100% accountability and cost tracking: personal access rights can be set and all transactions are logged to the individuals.

Products available around the clock.

Due to the small space requirement, SaveBox Smart+SaveBox Basic combination can be placed almost anywhere. Ideas include entry spaces of surgery rooms or MD offices.

You select the set-up you need: Connect more SaveBoxes together in any combination so you can even put together an entire wall.

Operates in your language: It has a multilingual user interface, which can display special national characters as well.

Fast and reliable support system

SaveBox system set-up

It is like building blocks: you can attach your own set of lockers to SaveBox Smart, designing a custom-build locker-setup matching exactly your needs.

Scale

SaveBox Smart can control lockers - SaveBox Basics - that can be upgraded with built-in scale units. With the help of the scale you can store and easily measure out small consumables and liquids, consumption of which can be hard to control. Scales can be built into one or even each of SaveBox' compartment and the take-out amount is controlled by the built-in weight-amount calculator.

 17,5 kg

 10.000 pcs

For the easy distribution of medical clothing, sheets or similar items, we developed two distribution boxes that fit perfectly in the lockers. The boxes come in two heights: 320 mm and 730 mm. But what makes them unique is their adjustable sidewalls: you can slide the walls in and out to fit to your items' sizes perfectly.

What can you store inside (SaveBoxes)

The possibilities are limitless- thanks to the built-in-scale - but best for :

Operation sets

Surgical pliers

Cutting tools

Needle

Syringe

Surgical garments

Bedpan

SaveBox variations

Specifications

- SaveBox Smart dimensions: 220 x 500 x 1840 mm •
- Own mass: 40-60 kg •
- Voltage 24V DC •

- Color basic: white
- Number of doors for SaveBox Basic: 2-10

We think in systems

SaveBox system is managed by the same, easy to use software application – SaveLog – as the rest of the IVM machines. Thus it is easily scalable with IVM's other powerful solutions.
