

THE SAVEBOX SYSTEM LOCKER-TYPE INDUSTRIAL ITEM DISTRIBUTION SYSTEM

SaveBox Smart is our compact and independent industrial vending machine that controls several types of smaller storage and distribution lockers: SaveBox Basics. It is like building blocks: you can pick one or even a set of different size Basics to be attached to your SaveBox Smart, giving you the ability to design a custom-build locker setup, matching your needs perfectly. Thanks to an optional function – the built-in scales – you can use SaveBox System for the 100% controlled distribution of bigger, heavier and fragile products or even small items, which are stored in bigger volume and difficult to measure one-by-one.

Why SaveBox System?

100% accountability and cost tracking: personal access rights can be set and all transactions are logged to the individuals.

Products available around the clock.

Up to 40 cost saving on your ppe or mro items

You select the set-up you need: Connect more SaveBoxes together in any combination so you can even put together an entire wall. Automatic SMS and email alerts to users and maintainers

Operates in your language: It has a multilingual user interface, which can display special national characters as well.

Fast and reliable support system

SaveBox Smart System set-up

It is like building blocks: you can attach your own set of lockers to SaveBox Smart, designing a custom-build locker-setup matching exactly your needs.

Options

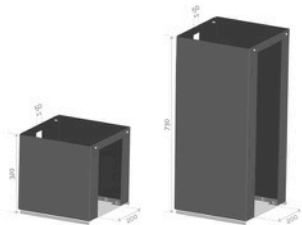

Scale

 17,5 kg

 10.000 pcs

SaveBox Smart can control lockers - SaveBox Basics - that can be upgraded with built-in scale units. With the help of the scale you can store and easily measure out small consumables and liquids, consumption of which can be hard to control. Scales can be built into one or even each of SaveBox' compartment and the take-out amount is controlled by the built-in weight-amount calculator.

Distribution box

Optional holders supplied by IVM with fixed heights (720/320 mm) that enable easier distribution of PPE items from the built-in scale and prevent them from moving around. Refilling is easy, just tare the scale with the holder before loading in your products. Fixed height but adjustable sides enable the holder to fit to any product size.

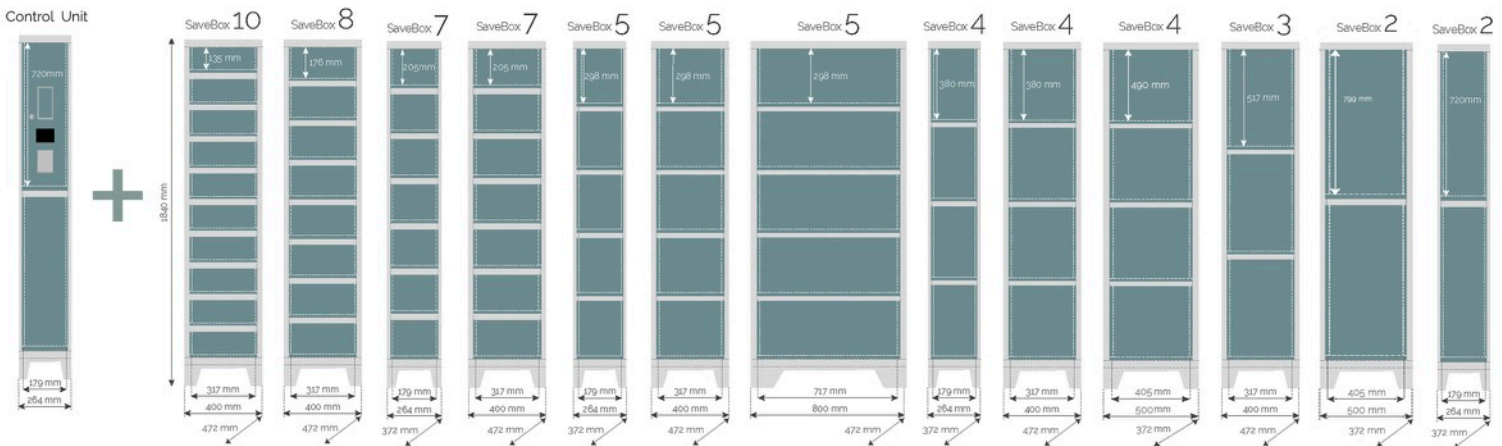

What can you store inside (SaveBoxes)

The possibilities are limitless-thanks to the built-in-scale, but best for:

Set-up variation

It is like building blocks: you can attach your own set of lockers to SaveBox Smart, designing a custom-build locker-setup matching exactly your needs.

Technical parameters

SaveBox Smart dimensions: 254 x 500 x 1840 mm

Own mass: 40-60 kg

Voltage 24V DC

Color basic: grey

Number of doors for SaveBox Basic: 2-10

We think in systems

SaveBox system is managed by the same, easy to use software application – SaveLog – as the rest of the IVM machines. Thus it is easily scalable with IVM's other powerful solutions.

IDENTIFICATION

Company card (RFID)

BAR code

PIN code
