

# SAVEPRO

## COIL-OPERATED MEDICAL VENDING MACHINE

IVM's third generation coil-based medical vending machine that stores and distributes medical equipment, tools and products that are used in the health industry. We recommend SavePro for organizations – hospitals, doctor's offices, health centers or even drug stores – that have a wide variety of medical tools, products to store and want to simplify and accelerate their availability.

## Why SavePro?

100% accountability and cost tracking: personal access rights can be set and all transactions are logged to the individuals.

All of your crucial medical equipment available 24/7.

You can distribute up to 2100 items. Average capacity: 1200-1400 pcs.

Access can be personalized product by product.

Operates in YOUR language: It has a multilingual user interface, which can display special national characters.

Can send automatic report and notification to refillers.

## What can you store inside

The possibilities are more than you can imagine, but to give you some examples:

Measuring instruments

Bandage

Glove

Medicines

Single-use tools

Medical sets

- Own mass: 300 kg
- Voltage 24V DC

- Color basic: white
- Max capacity: 2100 items
- Average capacity: 1400-1600 items

# SavePro add-ons

## SAVEPRO + SAVECON MODULE

SaveCon is a small-tool dispenser module, recommended for medical products, that need to be given-out one-by-one. It's conveyor-belt design provides fast and effective solution for distributing items like needles or other small items. SaveCon modules can be configured into SavePro positions one-by-one if requested and are shipped from as low as one unit.

## SAVEPRO + SAVEBOX BASIC

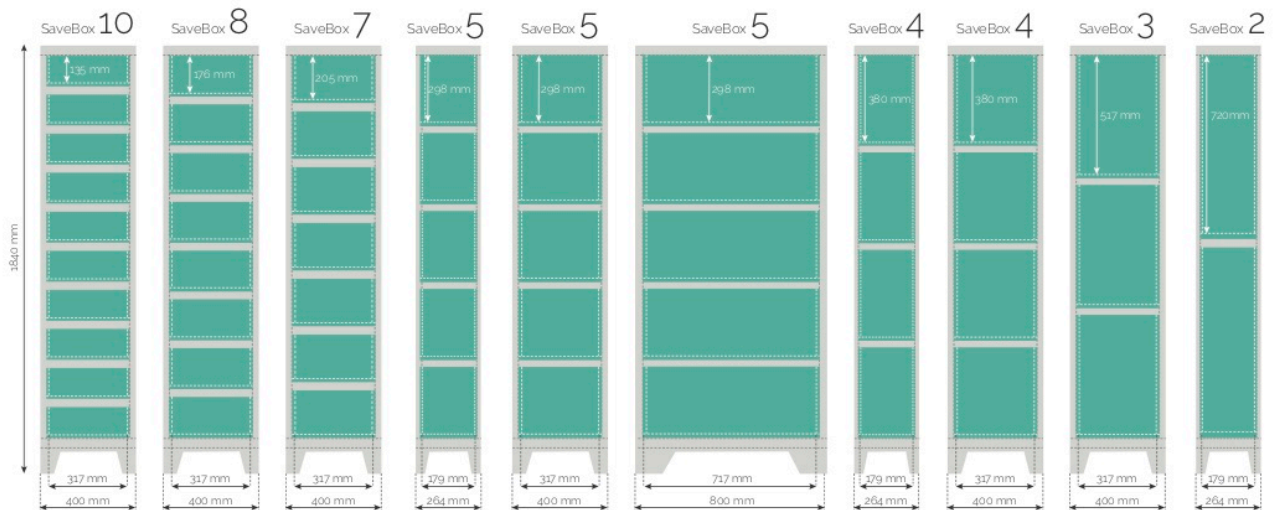

For distributing bigger, heavier items, SavePro can be connected with the SaveBox of your choice. SaveBox is an additional locker-type medical vending machine, which makes the storage and distribution of heavier, fragile or bigger items as easy as it gets.

### Built-in-Scale

Other than bigger, heavier items - thanks to SaveBox'optional built-in scale - you can store and easily measure out small consumables and liquids, consumption of which has been hard to control. Scales can be built into one or even each of SaveBox'compartment and the take-out amount is controlled by the built-in weight-amount calculator.

## SaveBox variations

## We think in systems

SaveProSmart is part of SaveLog system, which means that it is managed by the same, easy to use software application as the rest of our IVM machines. Thus it is easily scalable with our other powerful solutions.

### IDENTIFICATION

Company card (RFID)

BAR code

PIN code

### CONNECTIVITY

Local server, Plug&Play, 3G network, Mixed VPN-Local closed network, SaveNetwork (VPN), IVM cloud
